## Prescription Foliars® 20% Humic Acid

**Prescription Foliars® Humic Acid** with 20% bio-active humic acid is a high-quality soil conditioner. Apply as a soil amendment and or foliar application. It can be used with most fertilizers.

**DIRECTIONS FOR USE:** Shake well. A concentrated, soluble liquid suspension is < 100 microns. It is suitable for direct application or mix with soluble fertilizer formulations.

**FOLIAR APPLICATION:** Apply 2 – 4 ounces per 1,000 sq. ft. with 45 – 80 gallons of water per acre. May be mixed with foliar fertilizers.

**SOIL:** Apply 3 – 4 ounces per 1,000 sq. ft. 1-2 times per month with 85 – 120 gallons of water per acre. Lightly water into root zone.

**NOTE: We recommend a miscibility (jar) test before tank mixing. Fertilizers or nutrients with extremely low pH will cause the humic fraction to precipitate. It will be necessary to agitate your mix to obtain even distribution.**

**GUARANTEED ANALYSIS:**

Humic Acids ..... 20.00%

Also contains non-plant food ingredient  
20% Humic Acids (derived from plant compost)
