Greens Grade
(100 SGN) (-14 +35)

20% Humus • 15% Humic Acids • 1% Soil Penetrant • 2% Iron • 8% Calcium with Micronutrients

Gro-Power® Premium Green® 8-0-12 is a homogeneous formulation where no additional phosphorus is needed, providing a nitrogen-potassium ratio of (2:3). This multi-purpose fertilizer/soil conditioner using Gro-Power®'s advanced Matrix® technology has been developed for greens, tees, fairways, stadiums, sport fields, and any other areas where Bent, Hybrid Bermuda, Zoysia, St. Augustine and other turf varieties are utilized.

The nitrogen sources, utilizing sulphate of ammonia and urea, is readily available for a predictable quick response. The high potassium level will help provide increased disease resistance, summer durability and winter hardiness. A non-staining iron, along with sulphur, has been added to help produce dark green color and control the pH. A soil penetrant has been added to maximize water percolation into the soil profile.

The basic material in **Gro-Power® Premium Green® 8-0-12**, as in all Gro-Power® products, is Humus (20%). **Gro-Power® Premium Green® 8-0-12** also includes Humic Acids (15%). Humic Acids will react with the soil to help condition it and produce an environment in which the plant can achieve maximum results.
