

**Hello,**

I am reaching out to provide you with an update regarding Gro-Power and where we stand regarding production and product availability. After successfully relocating the Gro-Power manufacturing line to Huma production facilities in Arizona, our production team is now gearing up for the manufacturing process by assembling the machinery, re-registering the products, and sourcing the raw materials needed for production. I am pleased to inform you that we are aiming to start producing the Gro-Power product line this summer.

Your satisfaction is our top priority, which is why I want to assure you that the product formulations you have known and loved for years will remain unchanged. This means you can continue to rely on Gro-Power products for all your turf and ornamental needs. Your trust is invaluable to us, and we are committed to delivering the high-quality products you expect and deserve.

Our team is working diligently to fast-track this transition, and I will personally keep you updated throughout the process. Thank you for your patience and cooperation. If you have any questions or need assistance, please feel free to reach out to me.

We're looking forward to bringing you Gro-Power products very soon!

**Thank you for your continued trust and support,**

**Michael Gardner**

Director of Turf & Ornamental
